1991 Journal of Fluids Engineering Index
Index by Subject Matter to JFE, Vol. 113, Nos. 1-4, 1991

BLUFF-BODY FLOWS

Wake Characteristics of Two Circular Cylinders Arranged Perpendicular to Each Other, T. A. Fox, March, 45-50.
Turbulent Flow Around a Bluff Rectangular Plate. Part I: Experimental Investigation, N. Djilali and I. S. Gartshore, March, 51-59.
Turbulent Flow Around a Bluff Rectangular Plate. Part II: Numerical Predictions, N. Djilali, I. S. Gartshore, and M. Salcudean, March, 60-67.
Laminar Flow Past Colinear Spheres With Fluid Injection, H. Chiang and C. Kleinstreuer, June, 176-182.
Vortex Shedding From a Bluff Body Adjacent to a Plane Sliding Wall, M. P. Arnal, D. J. Goering, and J. A. C. Humphrey, September, 384-398.

BOUNDARY LAYER AND SHEAR FLOWS

Fine Structure of Vortex Sheet Rollup by Viscous and Inviscid Simulation, G. Tryggvason, W. J. A. Dahm, and K. Sbeih, March, 31-36.
The Role of Residual Nonturbulent Disturbances on Transition Onset in Two-Dimensional Boundary Layers, R. Govindarajan and R. Narashimha, March, 147-148.
An Optimum Suppression of Fluid Forces by Controlling a Shear Layer Separated From a Square Prism, H. Sakamoto, K. Tan, and H. Haniu, June, 183-189.
Intermittent Phenomena in the Flow Over a Rib Roughened Surface, T. Mullin and S. R. Martin, June, 206-209.
Experimental Study of Casing Boundary Layers in a Multistage Axial Compressor, S. Venkateswaran, June, 240-244.

COMPUTATIONAL METHODS

A Numerical Analysis of Pulsating Laminar Flow Through a Pipe Orifice, E. H. Jones, Jr. and R. A. Bajura, June, 199-205.
Numerical Analysis of Turbulent Flow in a Two-Dimensional Nonsymmetric Plane—Wall Diffuser, M. Yuan, C. C. S. Song, and J. He, June, 210-215.
A Multizone Time—Marching Technique for Unsteady Separating Three—Dimensional Boundary Layers and Its Application to the Symmetry—Plane Solution of an Impulsively Started Prolate Spheroid, T. Wu and S.-F. Shen, June, 228-239.
Modulation of Turbulence by a Dispersed Phase, R. A. Gore and C. T. Crowe, June, 304-307.
An Assessment of Computational Fluid Dynamic Techniques in the Analysis and Design of Turbomachinery—The 1990 Freeman Scholar Lecture, B. Lakshiminarayana, September, 315-352.
Navier-Stokes Calculations of Transonic Flows Past Cavities, S. Srinivasan and O. Baysal, September, 368-376.
Oscillating Flow Past a Rigid Circular Cylinder: A Finite—Difference Calculation, X. Wang and C. Dalton, September, 377-383.
Some Aspects of Uncertainty in Computational Fluid Dynamics Results, U. B. Mehta, December, 538-543.
A Numerical Study of Laminar 90—Degree Bend Duct Flow With Different Discretization Schemes, R. W. Yeo, P. E. Wood, and A. N. Hrymak, December, 563-568.
Aerodynamic Sensitivity Analysis Methods for the Compressible Euler Equations, O. Baysal and M. E. Eleshaky, December, 681-688.

DIFFUSER FLOWS

Finite—Element Analysis of Turbulent Flow in Annular Exhaust Diffusers of Gas Turbine Engines, E. A. Baskharone, March, 104-110.

FLOW CONTROL

Separation Control: Review, M. Gad-el-Hak and D. M. Bushnell, March, 5-30.
Vortex Shedding Lock—On and Flow Control in Bluff Body Wakes—Review, O. M. Griffin and M. S. Hall, December, 526-537.

FLOW MEASUREMENTS

Velocity Bias Associated With Laser Doppler Anemometer Controlled Processors, A. R. Winter, L. J. W. Graham, and K. Bremhorst, June, 250-255.
A Method for Correcting Wall Pressure Measurements in Subsonic Compressible Flow, C. Ducruet, June, 256-260.
A Cavitation Susceptibility Meter With Optical Cavitation Monitoring—Part One: Design Concepts, L. d'Agostino and A. J. Acosta, June, 261-269.
A Cavitation Susceptibility Meter With Optical Cavitation Monitoring—Part Two: Experimental Apparatus and Results, L. d'Agostino and A. J. Acosta, June, 270-277.

FLOW THROUGH POROUS MEDIA

A Singular Perturbation Solution for Couette Flow Over a Semi-Infinite Porous Bed, C. T. Hsu and P. Cheng, March, 137-142.
Effect of Crossflow on Oscillatory Flow in a Porous Medium Between Two Parallel Plates in Relative Motion, V. Kumaran and G. Ramanaiah, March, 151-154.
Oscillatory Fluid Flow Through a Porous Medium Channel Bounded by Two Impermeable Parallel Plates, J. M. Khodadadi, September, 509-510.

FLUID MACHINERY

An Experimental Investigation of Butterfly Valve Performance Downstream of an Elbow, M. J. Morris and J. C. Dutton, March, 81-85.
Viscosity Flow Correction for Small Control Valve Trim, H. D. Baumann, March, 86-91.
Suction Reverse Flow in an Axial-Flow Pump, K. Alpan and W. W. Peng, March, 90-97.
Experimental Study of Casing Boundary Layers in a Multistage Axial Compressor, S. Venkateswaran, June, 240-244.
An Assessment of Computational Fluid Dynamic Techniques in the Analysis and Design of Turbomachinery—The 1990 Freeman Scholar Lecture, B. Lakshiminarayana, September, 315-352.
A Finite—Element Perturbation Approach to Fluid/Rotor Interaction in Turbomachinery Elements. Part 1: Theory, E. A. Baskharone and S. J. Hensel, September, 353-361.
A Finite—Element Perturbation Approach to Fluid/Rotor Interaction in Turbomachinery Elements. Part 2: Application, E. A. Baskharone and S. J. Hensel, September, 362-367.
The Performance of Two Butterfly Valves Mounted in Series, M. J. Morris and J. C. Dutton, September, 419-423.
Maximum Pressure Head Due to Linear Valve Closure, C. P. Liou, December, 643-647.
Air Test Analysis of the Hydrogen Pump of Vulcain Rocket Engine, F. Bario, L. Barral, and G. Bois, December, 654-659.
LDV Measurements and Investigation of Flow Field Through Radial Turbine Guide Vanes, H. Eroglu and W. Tabakoff, December, 660-667.
Flow Measurements in a Model Burner—Part 1, D. F. G. Durão, M. V. Heitor, and A. L. N. Moreira, December, 669-674.

FLUID-STRUCTURE INTERACTIONS

A Numerical Model to Predict the Nonlinear Response of External Flow Over Vibrating Bodies (Planar Flow), N. K. Venkat and M. Spaulding, December, 544-554.
Vortex Shedding Lock-on and Flow Control in Bluff Body Wakes, O. M. Griffin and M. S. Hall, December, 526-537.

GENERAL TOPICS

Experimental Analysis and Flow Visualization of a Thin-Liquid Film on a Stationary and Rotating Disk, S. Thomas, A. Faghri, and W. Hankey, March, 73-80.
Basic Experiments Related to the Advanced Solor Pond (ASP) Performance, Y. Keren, G. A. Bemporad, and H. Rubin, March, 116-124.
Experimental Investigation of the Flow With a Free Surface in an Impulsively Rotating Cylinder, S. Choi, J. W. Kim, and J. M. Hyun, June, 245-249.
The Oscillations of Horseshoe Vortex Systems, C. J. Baker, September, 489-495.
The Structure of a Three-Dimensional Tip Vortex at High Reynolds Numbers, D. R. Stinebring, K. J. Farrell, and M. L. Billet, September, 496-503.
Visualization of the Wing-Tip Vortex in Temporal and Spatial Pressure Gradients, X. Liang and B. R. Ramaprian, September, 511-515.
Mean and Turbulence Characteristics of a Class of Three-Dimensional Wall Jets—Parts 2: Turbulence Characteristics, G. Padmanabham and B. H. Lakshmana Gowda, December, 629-634.
Torque Measurements of Corotating Disks in an Axisymmetric Enclosure, A. J. Hudson and P. A. Eibeck, December, 648-653.
On the Mach Number Variation in Steady Flows of Dense Hydrocarbons, M. S. Cramer, December, 675-680.
Gravity-Driven Motion of a Layer of Viscoelastic Fluid Around a Horizontal Wire, P. R. Souza Mendes, and M. F. Naccache, December, 689-694.
Partial Acoustic Filtering Applied to the Equations of Compressible Flow, J. R. Torczynski, December, 709-711.

1991 Journal of Fluids Engineering Index
Index by Subject Matter to JFE, Vol. 113, Nos. 1-4, 1991

BLUFF-BODY FLOWS

Wake Characteristics of Two Circular Cylinders Arranged Perpendicular to Each Other, T. A. Fox, March, 45-50.
Turbulent Flow Around a Bluff Rectangular Plate. Part I: Experimental Investigation, N. Djilali and I. S. Gartshore, March, 51-59.
Turbulent Flow Around a Bluff Rectangular Plate. Part II: Numerical Predictions, N. Djilali, I. S. Gartshore, and M. Salcudean, March, 60-67.
Laminar Flow Past Colinear Spheres With Fluid Injection, H. Chiang and C. Kleinstreuer, June, 176-182.
Vortex Shedding From a Bluff Body Adjacent to a Plane Sliding Wall, M. P. Arnal, D. J. Goering, and J. A. C. Humphrey, September, 384-398.

BOUNDARY LAYER AND SHEAR FLOWS

Fine Structure of Vortex Sheet Rollup by Viscous and Inviscid Simulation, G. Tryggvason, W. J. A. Dahm, and K. Sbeih, March, 31-36.
The Role of Residual Nonturbulent Disturbances on Transition Onset in Two-Dimensional Boundary Layers, R. Govindarajan and R. Narashimha, March, 147-148.
An Optimum Suppression of Fluid Forces by Controlling a Shear Layer Separated From a Square Prism, H. Sakamoto, K. Tan, and H. Haniu, June, 183-189.
Intermittent Phenomena in the Flow Over a Rib Roughened Surface, T. Mullin and S. R. Martin, June, 206-209.
Experimental Study of Casing Boundary Layers in a Multistage Axial Compressor, S. Venkateswaran, June, 240-244.

COMPUTATIONAL METHODS

A Numerical Analysis of Pulsating Laminar Flow Through a Pipe Orifice, E. H. Jones, Jr. and R. A. Bajura, June, 199-205.
Numerical Analysis of Turbulent Flow in a Two-Dimensional Nonsymmetric Plane—Wall Diffuser, M. Yuan, C. C. S. Song, and J. He, June, 210-215.
A Multizone Time—Marching Technique for Unsteady Separating Three—Dimensional Boundary Layers and Its Application to the Symmetry—Plane Solution of an Impulsively Started Prolate Spheroid, T. Wu and S.-F. Shen, June, 228-239.
Modulation of Turbulence by a Dispersed Phase, R. A. Gore and C. T. Crowe, June, 304-307.
An Assessment of Computational Fluid Dynamic Techniques in the Analysis and Design of Turbomachinery—The 1990 Freeman Scholar Lecture, B. Lakshiminarayana, September, 315-352.
Navier-Stokes Calculations of Transonic Flows Past Cavities, S. Srinivasan and O. Baysal, September, 368-376.
Oscillating Flow Past a Rigid Circular Cylinder: A Finite—Difference Calculation, X. Wang and C. Dalton, September, 377-383.
Some Aspects of Uncertainty in Computational Fluid Dynamics Results, U. B. Mehta, December, 538-543.
A Numerical Study of Laminar 90—Degree Bend Duct Flow With Different Discretization Schemes, R. W. Yeo, P. E. Wood, and A. N. Hrymak, December, 563-568.
Aerodynamic Sensitivity Analysis Methods for the Compressible Euler Equations, O. Baysal and M. E. Eleshaky, December, 681-688.

DIFFUSER FLOWS

Finite—Element Analysis of Turbulent Flow in Annular Exhaust Diffusers of Gas Turbine Engines, E. A. Baskharone, March, 104-110.

FLOW CONTROL

Separation Control: Review, M. Gad-el-Hak and D. M. Bushnell, March, 5-30.
Vortex Shedding Lock—On and Flow Control in Bluff Body Wakes—Review, O. M. Griffin and M. S. Hall, December, 526-537.

FLOW MEASUREMENTS

Velocity Bias Associated With Laser Doppler Anemometer Controlled Processors, A. R. Winter, L. J. W. Graham, and K. Bremhorst, June, 250-255.
A Method for Correcting Wall Pressure Measurements in Subsonic Compressible Flow, C. Ducruet, June, 256-260.
A Cavitation Susceptibility Meter With Optical Cavitation Monitoring—Part One: Design Concepts, L. d'Agostino and A. J. Acosta, June, 261-269.
A Cavitation Susceptibility Meter With Optical Cavitation Monitoring—Part Two: Experimental Apparatus and Results, L. d'Agostino and A. J. Acosta, June, 270-277.

FLOW THROUGH POROUS MEDIA

A Singular Perturbation Solution for Couette Flow Over a Semi-Infinite Porous Bed, C. T. Hsu and P. Cheng, March, 137-142.
Effect of Crossflow on Oscillatory Flow in a Porous Medium Between Two Parallel Plates in Relative Motion, V. Kumaran and G. Ramanaiah, March, 151-154.
Oscillatory Fluid Flow Through a Porous Medium Channel Bounded by Two Impermeable Parallel Plates, J. M. Khodadadi, September, 509-510.

FLUID MACHINERY

An Experimental Investigation of Butterfly Valve Performance Downstream of an Elbow, M. J. Morris and J. C. Dutton, March, 81-85.
Viscosity Flow Correction for Small Control Valve Trim, H. D. Baumann, March, 86-91.
Suction Reverse Flow in an Axial-Flow Pump, K. Alpan and W. W. Peng, March, 90-97.
Experimental Study of Casing Boundary Layers in a Multistage Axial Compressor, S. Venkateswaran, June, 240-244.
An Assessment of Computational Fluid Dynamic Techniques in the Analysis and Design of Turbomachinery—The 1990 Freeman Scholar Lecture, B. Lakshiminarayana, September, 315-352.
A Finite—Element Perturbation Approach to Fluid/Rotor Interaction in Turbomachinery Elements. Part 1: Theory, E. A. Baskharone and S. J. Hensel, September, 353-361.
A Finite—Element Perturbation Approach to Fluid/Rotor Interaction in Turbomachinery Elements. Part 2: Application, E. A. Baskharone and S. J. Hensel, September, 362-367.
The Performance of Two Butterfly Valves Mounted in Series, M. J. Morris and J. C. Dutton, September, 419-423.
Maximum Pressure Head Due to Linear Valve Closure, C. P. Liou, December, 643-647.
Air Test Analysis of the Hydrogen Pump of Vulcain Rocket Engine, F. Bario, L. Barral, and G. Bois, December, 654-659.
LDV Measurements and Investigation of Flow Field Through Radial Turbine Guide Vanes, H. Eroglu and W. Tabakoff, December, 660-667.
Flow Measurements in a Model Burner—Part 1, D. F. G. Durão, M. V. Heitor, and A. L. N. Moreira, December, 669-674.

FLUID-STRUCTURE INTERACTIONS

A Numerical Model to Predict the Nonlinear Response of External Flow Over Vibrating Bodies (Planar Flow), N. K. Venkat and M. Spaulding, December, 544-554.
Vortex Shedding Lock-on and Flow Control in Bluff Body Wakes, O. M. Griffin and M. S. Hall, December, 526-537.

GENERAL TOPICS

Experimental Analysis and Flow Visualization of a Thin-Liquid Film on a Stationary and Rotating Disk, S. Thomas, A. Faghri, and W. Hankey, March, 73-80.
Basic Experiments Related to the Advanced Solor Pond (ASP) Performance, Y. Keren, G. A. Bemporad, and H. Rubin, March, 116-124.
Experimental Investigation of the Flow With a Free Surface in an Impulsively Rotating Cylinder, S. Choi, J. W. Kim, and J. M. Hyun, June, 245-249.
The Oscillations of Horseshoe Vortex Systems, C. J. Baker, September, 489-495.
The Structure of a Three-Dimensional Tip Vortex at High Reynolds Numbers, D. R. Stinebring, K. J. Farrell, and M. L. Billet, September, 496-503.
Visualization of the Wing-Tip Vortex in Temporal and Spatial Pressure Gradients, X. Liang and B. R. Ramaprian, September, 511-515.
Mean and Turbulence Characteristics of a Class of Three-Dimensional Wall Jets—Parts 2: Turbulence Characteristics, G. Padmanabham and B. H. Lakshmana Gowda, December, 629-634.
Torque Measurements of Corotating Disks in an Axisymmetric Enclosure, A. J. Hudson and P. A. Eibeck, December, 648-653.
On the Mach Number Variation in Steady Flows of Dense Hydrocarbons, M. S. Cramer, December, 675-680.
Gravity-Driven Motion of a Layer of Viscoelastic Fluid Around a Horizontal Wire, P. R. Souza Mendes, and M. F. Naccache, December, 689-694.
Partial Acoustic Filtering Applied to the Equations of Compressible Flow, J. R. Torczynski, December, 709-711.

JET FLOWS

Real-Time Video Analysis of Twin Jets in a Crossflow, F. Savory and N. Toy, March, 68–72.

Anisotropy in a Turbulent Jet Near a Free Surface, T. F. Swean, Jr., S. E. Ramberg, and E. W. Miner, September, 430–438.

A New Way to Represent Jet Pump Performance, D. E. Elger, E. T. McLam, and S. J. Taylor, September, 439–444.

Mean Flow Field and Reynolds Stress Behavior in Coannular Jet Flow With Swirl Along a Centerbody, M. O. Frey and F. B. Gessner, September, 445–452.

Experimental and Analytical Study of Flow Diversion Beyond an Underexpanded Nozzle, E. C. Hansen, September, 475–478.

Computational Analysis of the Transonic Flow Field of Two-Dimensional Minimum Length Nozzles, B. M. Agrow and G. Emanuel, September, 479–488.

Mean and Turbulence Characteristics of a Class of Three-Dimensional Wall Jets—Part 1: Mean Flow Characteristics, G. Padmanabham and B. H. Lakshmana Gowda, December, 620–628.

MULTIPHASE BUBBLY FLOWS

Correlation Single Phase Flow Measurements With Observations of Trailing Vortex Cavitation, S. I. Green, March, 125–129.

Mechanisms of Cavitation Inception—Review, E. P. Rood, June, 163–175.

A Cavitation Susceptibility Meter With Optical Cavitation Monitoring—Part One: Design Concepts, L. d'Agostino and A. J. Acosta, June, 261–269.

A Cavitation Susceptibility Meter With Optical Cavitation Montioring—Part Two: Experimental Apparatus and Results, L. d'Agostino and A. J. Acosta, June, 270–277.

Some Characteristics of Flow Past Backward Facing Steps Including Cavitation Effects, A. S. Ramamurthy, R. Balachander, and H. S. Govinda Ram, June, 278–284.

Convective Gaseous Diffusion in Steady Axisymetric Cavity Flows, B. Parkin and K. Ravindra, June, 285–289.

Unsteady Gaseous Diffusion Associated With a Fully Cavitating Oscillating Flat—Plate Hydrofoil, K. Ravindra and B. R. Parkin, June, 290–294.

Homogeneous Turbulence in Bubbly Flows, M. Lance, J. L. Marié, and J. Bataille, June, 295–300.

Nonideal Gas Effects for the Venturi Meter, W. Bober and W. L. Chow, June, 301–303.

A Theoretical and Experimental Study of the Characterization of Bubbles Using Light Scattering Interorometry, A. Breña de la Rosa, S. V. Sankar, B. J. Weber, G. Wang and W. D. Bachalo, September, 460–468.

Studies of Scaling of Tip Vortex Cavitation Inception on Marine Lifting Surfaces, C. C. Hsu, September, 504–508.

Separation and Surface Nuclei Effects in a Cavitation Susceptibility Meter, L. d'Agostino and A. J. Acosta, December, 695–699.

MULTIPHASE PARTICLE FLOW

Application of Lumley's Drag Reduction Model to Two-Phase Gas—Particle Flow in a Pipe, K. S. Han, M. K. Chung, and H. J. Sung, March, 130–136.

Modulation of Turbulence by a Dispersed Phase, R. A. Gore and C. T. Crowe, June, 304–307.

Initial Drop Size and Velocity Distributions for Airblast Coaxial Atomizers, H. Eroglu and N. Chigier, September, 453–459.

Characterization of Injection Nozzles for Gas—Solid Flow Applications, F. T. Dodge, S. T. Green, and J. E. Johnson, September, 469–474.

PIPE-DUCT-CHANNEL FLOWS

General Correlations and Selection Procedures for Flow in Polyethylene Tubes With Uniformly Spaced Wall Orifices, E. Brundrett, March, 98–103.

Wall Pressure and Shear Stress Variations in a 90-Deg. Bifurcation During Pulsatile Laminar Flow, J. M. Khodadadi, March, 111–115.

Visualization of High Blockage Flow Behind a Flat Plate in a Rectangular Channel, C. O. Popiel and J. T. Turner, March, 143–146.

An Erosion Resistant Pipe Bend, K. Horii, Y. Matsumae, X. M. Cheng, M. Takei, E. Yasukawa, and B. Hashimoto, March, 149–150.

The Influence of Structural Damping on Internal Pressure During a Transient Pipe Flow, D. D. Budny, D. C. Wiggert, and F. J. Hatfield, September, 424–429.

Numerical Analysis of Laminar Flow in Curved Elliptic Ducts, Z. F. Dong and M. A. Ebadian, December, 555–562.

Improving Zielke's Method of Simulating Frequency—Dependent Friction in Laminar Liquid Pipe Flow, K. Suzuki, T. Taketomi, and S. Sato, December, 569–573.

Laminar Flow Over Wavy Walls, V. C. Patel, J. Tyndall Chon, and J. Y. Yoon, December, 574–578.

Application of V Shape Riblets to Pipe Flows, Shin-ichi Nakao, December, 587–590.

Turbulent Flow in a Channel With a Wavy Wall, V. C. Patel, J. Tyndall Chon, and J. Y. Yoon, December, 579–586.

A Statistical Analysis of Cavitation Erosion Pits, B. Belahadji, J. P. Franc, and J. M. Michel, December, 700–706.

SEPARATION

Separation Control: Review, M. Gad-el-Hak and D. M. Bushnell, March, 5–30.

Effect of Freestream Velocity on the Three-Dimensional Separated Flow Region in Front of a Cylinder, W. A. Eckerle and J. K. Awad, March, 37–44.

Numerical Computation of Laminar Separation and Reattachment of Flow Over Surface Mounted Ribs, Y.-J. Hong, S.-S. Hsieh, and H.-J. Shih, June, 190–198.

Three-Dimensional Vortex Structure in a Leading—Edge Separation Bubble at Moderate Reynolds Numbers, K. Sasaki and M. Kiya, September, 405–410.

STABILITY AND TRANSITION

Further Experiments on Transition to Turbulence in Constant—Acceleration Pipe Flow, P. J. Lefebvre and F. M. White, June, 223–227.

Effect of Suction on the Stability of Supersonic Boundary Layers. Part I—Second-Mode Waves, A. A. Al-Maaitah, A. H. Nayfeh, and J. A. Masad, December, 591–597.

Effect of Suction on the Stability of Supersonic Boundary Layers. Part II—First-Mode Waves, J. A. Masad, A. H. Nayfeh, and A. A. Al-Maaitah, December, 598–601.

Direct Determination of the Onset of Transition to Turbulence in Flow Passages, N. T. Obot, J. A. Jendzejczyk, and M. W. Wambsganss, December, 602–607.

TURBULENT FLOWS

A Numerical Investigation of the Turbulent Flow Field Generated by a Stationary Cube, R. Raul and P. S. Bernard, June, 216–222.

Velocity Profiles for Turbulent Boundary Layers Under Freestream Turbulence, J. A. Hoffman and K. Mohammadi, September, 399–404.

Computation of Turbulent Flow in a Thin Liquid Layer of Fluid Involving a Hydraulic Jump, M. M. Rahman, A. Faghri, and W. L. Hankey, September, 411–418.

Prediction of Three-Dimensional Developing Turbulent Flow in a Square Duct With an Anisotropic Low-Reynolds-Number $k-\epsilon$ Model, H. K. Myong and T. Kobayashi, December, 608–615.

An Eddy Viscosity Calculation Method for a Turbulent Duct Flow, R. A. Antonia, D. K. Bisset, and J. Kim, December, 616–619.

Experimental Investigation of a Turbulent Flow in the Vicinity of an Appendage Mounted in a Flat Plate, P. Merati, H. M. McMahon, K. M. Yoo, December, 635–642.

Local Anisotropy in Strained Turbulence at High Reynolds Number, P. A. Durbin and C. G. Speziale, December, 707–708.

Reattachment Length Behind a Single Roughness Element in Turbulent Pipe Flow, J. Faramarzi and E. Logan, December, 712–714.
